

Uni Release - ES Form Release

A totally environmentally safe form release compound, ES Form Release is completely biodegradable, non-flammable, non-toxic, and contains no petroleum distillate.

Specifications:

Appearance	Light amber liquid
Chemical Composition	Natural polymers, glycerides, natural form release compounds
Specific Gravity	0.90
Chemical Activity	Contains ingredients that reacts with concrete to ensure positive release
Flammability	Non-flammable

Applications:

ES Form Release may be applied by spraying at 40 psi on to metal or wooden forms. Use only a very light coat as ES Form Release is more effective than petroleum carbon based release.

Safety: See material safety data sheet

Caution: Spills are slippery, clean up promptly

Note: Viscosity at 20°C is 70 cps; At 5°C is 152 cps

Storage: Store in a cool, dry area away from open fire, flame of ignition source
