Use FODS TRACKOUT CONTROL SYSTEM on your next project. FODS MATS contain Alternating Rows of Pyramids that Effectively Remove Mud from Tires without Disturbing the Ground or Damaging the Tire.

FODS Outperforms Traditional Stabilized Entrances. FODS TRACKOUT CONTROL MATS have proven Performance through Stress Testing of 1,000,000 Vehicle Passes and each mat can hold 250,000 lbs. Each pyramid can withstand 20,000 lbs. of pressure.

FODS are Manufactured from a Extremely Strong Proprietary Blend of UV Resistant, High Density Polyethylene.

FODS Mats are 12’ wide in the direction of travel by 7’ long. FODS are 100% Recyclable and 100% Made in the USA.

FODS ADVANTAGES:
• DURABLE
• REUSABLE
• RAPID INSTALLATION
• ANY CONFIGURATION
• ANY SUBSTRATE
• ANY INDUSTRY
• ANY WEATHER

ON TIME.
ON BUDGET.
MINIMAL LABOR.
ALL YEAR LONG.
FODS Trackout Control Mats are effective and can stand up to extreme weather conditions. FODS mats are made from a proprietary blend of durable, UV resistant, High Density Polyethylene with special impact modifications and thermal expansion accommodations. The patented internal re-enforcing structure of the pyramids means that the FODS mat can handle nearly unlimited weight.

ON BUDGET.
Cut labor and materials cost, and say goodbye to riprap forever. FODS allow you accurate job costing, estimation, and ROI. FODS are more effective than rock, and are designed to be reused on multiple projects. FODS will prevent costly construction site trackout fines and save you from spending money on construction entrance maintenance refreshment. FODS mats are economical and practical.

MINIMAL LABOR.
FODS are lighter than steel rumble grates, weighing 430 lbs. each. FODS do not require refreshment and are easy to maintain. FODS can be installed manually using FODS hooks or with equipment. FODS are easily interconnected with steel hardware and can be configured to any entrance layout. FODS are Reusable and are easy to move, remove, and relocate. No excavation or disturbance of existing soil is necessary, protecting the environment and saving on labor costs. Mats are easy to clean. The design allow mats to be nested together for easy storage, and transport. FODS mats are 12’ wide x 7’ long. Many entrances can be shipped on one truck and will not exceed the width requirements for highway transportation.
